

TECHNICAL ACCOUNTING

Public Global Energy Company

ENGAGEMENT OVERVIEW

Amid a surge in M&A activity, a publicly traded global energy company needed to augment its technical accounting capabilities to keep pace with due diligence, deal documentation, and reporting requirements. Facing capacity constraints and a high volume of complex transactions, the company engaged Alliance to provide targeted technical accounting support. Alliance delivered a flexible staffing model, including senior-level expertise and full-time support, that integrated seamlessly with the client's geographically dispersed team—allowing them to manage deal flow without disrupting operations or reporting timelines.

“
I appreciate the Alliance consultant's ability to step in a take ownership. They hit the ground running and took the initiative to work through accounting documentation on significant contracts and M&A activity, while seamlessly integrating and becoming a trustworthy, 'go-to,' member of our team.
- Controller”

ALLIANCE SOLUTION

Alliance provided strategic and operational support through:

01

M&A Deal Support

Delivered timely guidance and documentation for many acquisitions, ensuring alignment with standards and policies.

02

Seamless Team Integration

Fully embedded into the client's existing structure across locations, enhancing efficiency and minimizing onboarding time.

03

Flexible Resourcing Model

Combined senior oversight and cost-effective execution support, allowing the client to flex based on workload and internal availability.

04

Documentation & Review Rigor

Produced thorough, audit-ready accounting memos, helping to streamline internal reviews, and reduce rework.

CLIENT OUTCOMES

- Completed deal documentation and financial reporting activities on time—supporting the company's ability to meet quarterly deadlines.
- Enabled a smooth backfill of a critical technical accounting role with no disruption to ongoing operations or need for extensive internal training.
